

Melbourne's Bar Ampere

At Martel Upholstery, we are experienced at producing custom furniture for commercial installations including bar and restaurant fit-outs, shop fit-outs and office redesigns. We enjoy every stage of the process from the design right through to installation. As the furniture is often the last step in the build process, we are lucky enough to see how our furniture looks in the context of the finished design.

Recently, we worked on banquette seating for Melbourne's Bar Ampere. The seating is finished in green NSW Leather. The bar is located in Russell Place above an old electrical substation and its industrial-inspired interiors include antique lights, old hairdressing equipment and furniture from the US army. The banquette seating looks great in this quirky setting.
